

One Suite for Integration

The Challenge

- Enterprises run hybrid landscapes (SAP + non-SAP, cloud + on-prem).
- Manual integrations are complex, costly, and error-prone.
- Lack of real-time data flow reduces agility and decision making

Solution – SAP BTP Integration Suite

- Provides a unified set of services to connect applications, data, and processes.
- Supports cloud, on-premise, and hybrid integration scenarios.
- Enables real-time, secure, and scalable data exchange across the enterprise.

Key Features

- Cloud Integration: Prebuilt connectors and APIs for SAP and third-party apps.
- API Management: Design, publish, and secure APIs for reuse.
- Event Mesh: Realtime event driven communication across systems.
- Open Connectors: Simplify integration with 160+ non-SAP applications.
- Integration Advisor: AI-driven mapping and recommendations for faster setup.
- Monitoring & Security: End-to-end visibility and compliance controls.

Benefits & value

Metric	Value
Integration projects	50% faster
TCO	Consolidated suite
Agility	Realtime data flows
Trust	Secure data exchange

- 50% faster integration projects with prebuilt content and AI guidance.
- Reduced TCO by consolidating integration tools into one suite

Strategic Impact

- Enables seamless digital transformation by connecting core and edge systems.
- Supports innovation by exposing APIs for new business models.
- Positions enterprises to respond quickly to market and regulatory changes.
