

Low Code Innovation at Enterprise Scale

The Challenge

- Business teams depend heavily on IT for app development.
- Traditional coding cycles are slow and resource intensive.
- Demand for digital solutions outpaces developer capacity

Solution – SAP Build

- Provides a low code/no code environment for building apps, workflows, and automation.
- Empowers business users to create solutions without deep technical skills.
- Integrates seamlessly with SAP and non-SAP systems

Key Features

- Build Apps: Drag and drop UI for creating responsive business apps.
- Build Process Automation: Automate workflows and approvals with prebuilt templates.
- Build Work Zone: Create digital workspaces that unify apps, content, and collaboration.
- Integration: Connect to SAP S/4HANA, SuccessFactors, and third-party systems.
- AI Services: Embed intelligent features like chatbots and document processing.

Benefits & value

Metric	Value
App development speed	50–70% faster
IT backlog	Citizen developers
Development costs	Reusable components
Agility	Rapid prototyping

- Lower IT backlog by enabling citizen developers.
- Reduced costs through reusable components and templates.

Strategic Impact

- Democratize app development across the enterprise.
- Aligns IT and business teams for faster transformation.
- Positions organizations to respond quickly to market changes
